This course offers a comprehensive introduction to Artificial Intelligence (AI), Machine Learning (ML), and Deep Learning (DL), with a focus on practical applications. Through a series of structured modules, learners will explore foundational concepts, from understanding datasets to implementing AI models. The course covers optimization techniques, linear regression, and deep learning, emphasizing real-world problem-solving. It includes low-code no-code hands-on coding exercises with interactive dashboards to solidify theoretical concepts, ensuring learners can apply their knowledge to develop AI-driven solutions.

Skills / Knowledge

Public Health Policy Development

Advocacy and Lobbying Techniques

Legal and Ethical Considerations in Public Health

Research Analysis and Application

Strategic Communication and Public Speaking

Legislative Process Understanding

ISSUED ON

May 21, 2025
